DETAILED ACTION

Allowable Subject Matter

1. Claims 1-31 are allowed.
2. The following is an examiner's statement of reasons for allowance:
3. The following is a statement of reasons for the indication of allowable subject matter:

Examiner agrees with Applicants that Stallings, "Computer Organization and Architecture", 4th edition, 1996, pages 259-262, and 368-371, the closest reference, and the other prior art do not teach or fairly suggest:

an active protected operating mode of the plurality of protected operating modes is determined, at least in part, responsive to the code segment descriptor (in claim 1; claims 7, and 13 each recite the corresponding limitations) in combination with all of the other limitations in the respective independent claims (claims 1, 7, and 13);

the execution core is not responsive to the segment descriptor if the first protected operating mode is active (in

Art Unit: 2183

claim 3; claims 9, and 15 each recite the corresponding limitations) in combination with all of the other limitations in the respective independent claims (claims 3, 9, and 15); and

the loading performed in a first protected operating mode in which at least one of the one or more segment descriptors is not used even if an instruction specifying the corresponding segment register is executed by a processor (in claim 19; claims 24, and 28 each recite the corresponding limitations) in combination with all of the other limitations in the respective independent claims (claims 19, 24, and 28), and the combination is not obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
